

Isumi Gehansa Herath

PREFACE

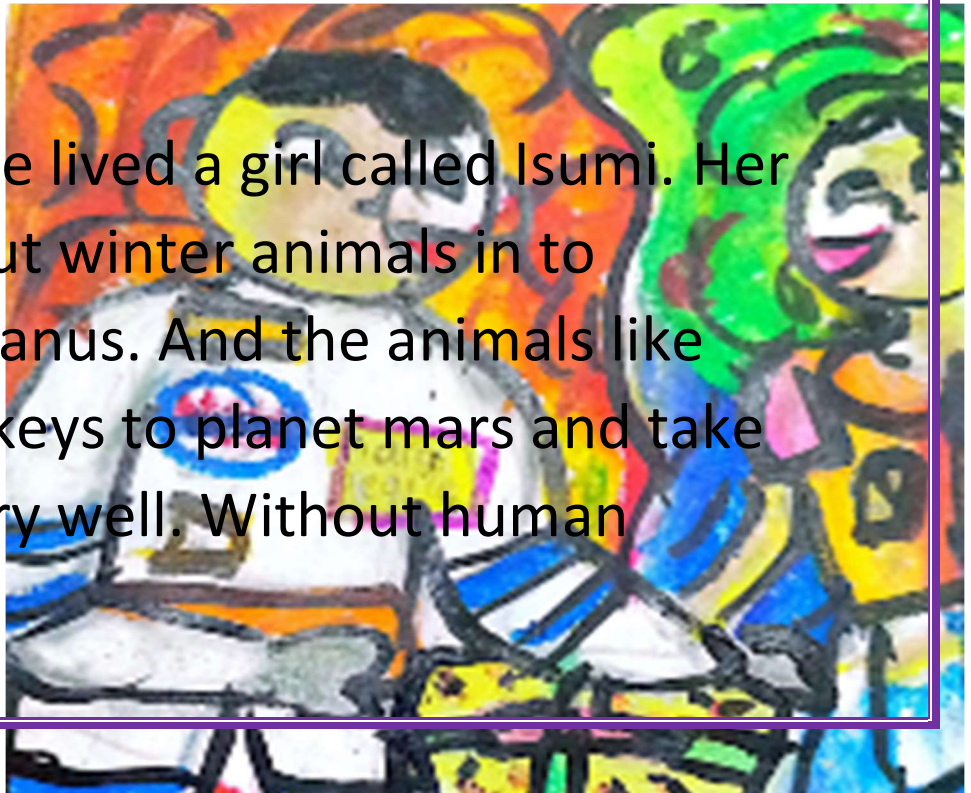

I specially created this book for my school e-book writing event. I think young children may learn bit about astronomy. I want to give a special thanks to my school, my mother and my loving sister. This book also gives the children knowledge, adventure and value of Buddhism. This book is for everyone who's struggling to find about the universe.

**This book is dedicated
to my beloved mother,
father, teachers, siblings
and my dear friends.**

Thank you.

Once upon a time people lived in planet mars. And their life style was similar to our life style. They were very friendly with people who in planet earth. They exchange fruits, vegetables from us. And they tried to plant seeds to take fruits and vegetables. They gave story books they had written in the space for small children and advanced books about space to adults.

In Sri Lanka there lived a girl called Isumi. Her ambition is to put winter animals in to Neptune and Uranus. And the animals like cats, dogs, monkeys to planet mars and take care of them very well. Without human

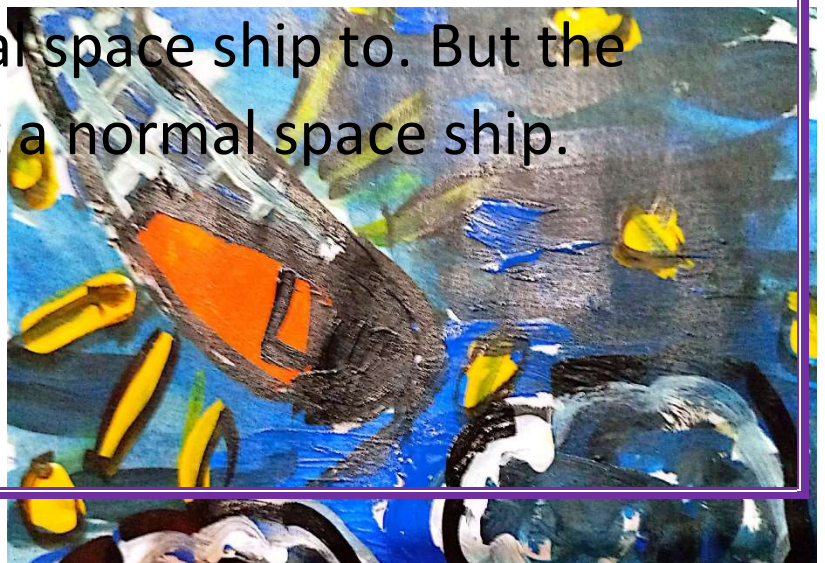

influence. And this is a mysterious story that happened to people in mars. And it explains how she helped them to rescue. And this is about it

I was watching at the sky. Oh! What a beautiful place is that. Mars people are so lucky. Can I go there quickly to make my dream job a truth. Oh! Space is full with mysterious things. Like stars, nebulas, planets, galaxies, sun, moon and millions and trillions of wonders. What is the end of the space? Why does it doesn't end?

It is like the secret kingdom. Like the the book I am reading. Dear stars, why are you shining so brightly? You are like tiny suns. Ah! Isumi are you mad? They are little suns. Sometimes

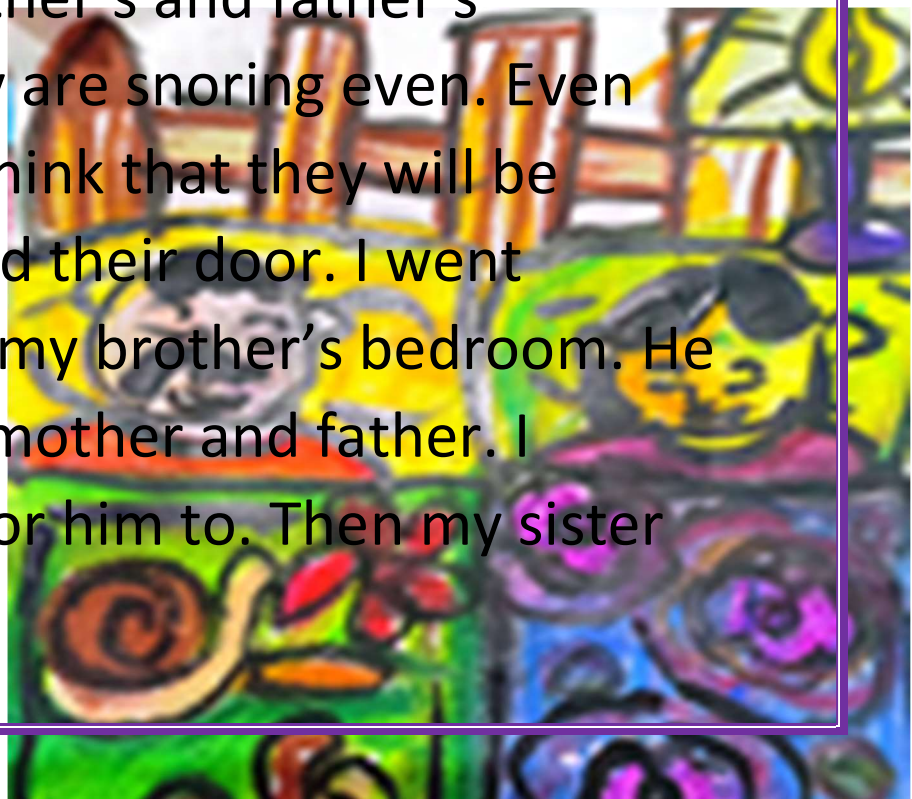

you forget everything
when you are watching
at the sky. Whatever
what is that? It is shining, but only in the
middle of it. Is it a satellite? It couldn't be.
Because we can see satellites in the normal
sky even. So it couldn't be. But it can be a
star. Are you mad Isumi? The hall star is
shining. So it is not a star even. Then what is
it? Is it a space ship? I had read books about
aliens. So their space ships are UFOS.
Then it says that they are shining in the
middle of them to. So is it an UFOS? OH MY
GOD! I am scared of aliens. They are very
powerful. Their technology is very difficult.
But it can be a normal space ship to. But the
problem is, if it is not a normal space ship.
But UFOS is oval.
I don't care about it.

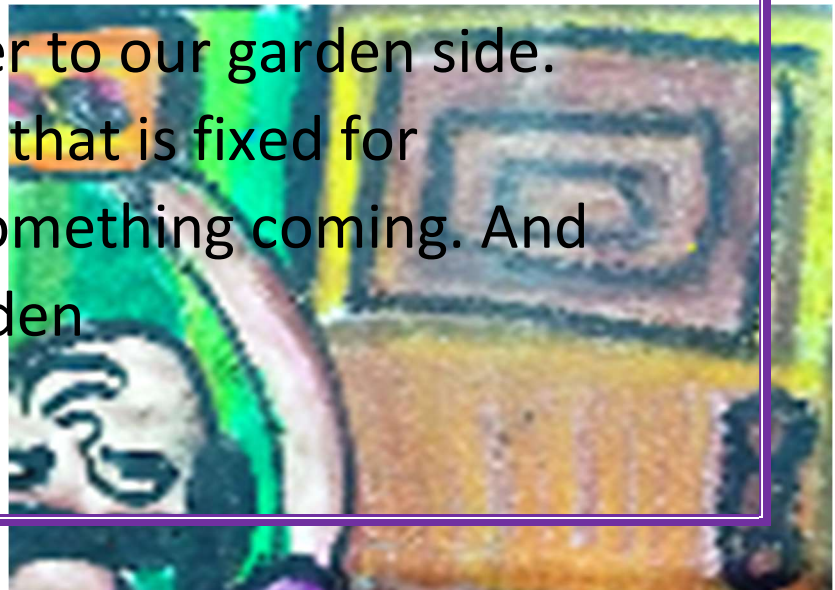

Because it is definitely going to America. That means NASA. And Nasa will be tell the information about it. So I don't need to be scared.

But it came closer to our garden side. Then I cared about it a lot. I looked at it from eagle eyes. Then I saw that it is coming to this side. And it is so closer to our GARDEN! Everybody is sleeping very well right. Then let's peep at them a little. I walked slowly, slowly at the door. Then I opened it making no noise. Then I went near my mother's and father's bedroom. OH! They are snoring even. Even the sky fall I don't think that they will be awake. Then I closed their door. I went slowly, slowly near my brother's bedroom. He is snoring than my mother and father. I thought the same for him to. Then my sister

She was covering her half body from bedsheets and pillows. I closed their doors to. Then I think a twice that am I going or not.

Then I made a strong decision to go. Then I went to my room again and pickup my teddy. I hug him and I went down stairs. Not faster or my normal speed. I went slowly, slowly, slowly and slowly. When I keep my feet down I look around. And when I lift it again I look around. Then I was closer to the end of the stairs. I kept my last feet. Then I went slowly, slowly near the lights. I put on them. I was so silence. Then I went near the door. I look outside from the window. I saw the object in the sky. It was so closer to our garden side. Then I put on the light that is fixed for outside. Then I hear something coming. And it fell down to our garden

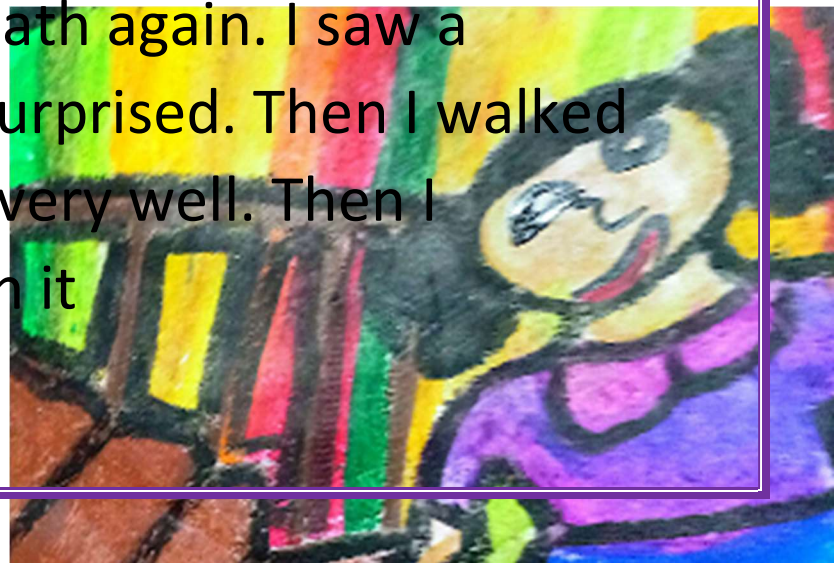

making a little noise.

Then I was scared than
before. I think it is an UFOS.

Because it only makes a little sound.

And if it makes a little sound, it needs to be
controlling by someone. So it can be
controlling by aliens. Oh! Isumi why are you
always thinking from the negative side. It can
be a normal object. Then I slowly opened the
door. I closed my eyes tightly and I stopped
screaming by myself. I took a deep breath.

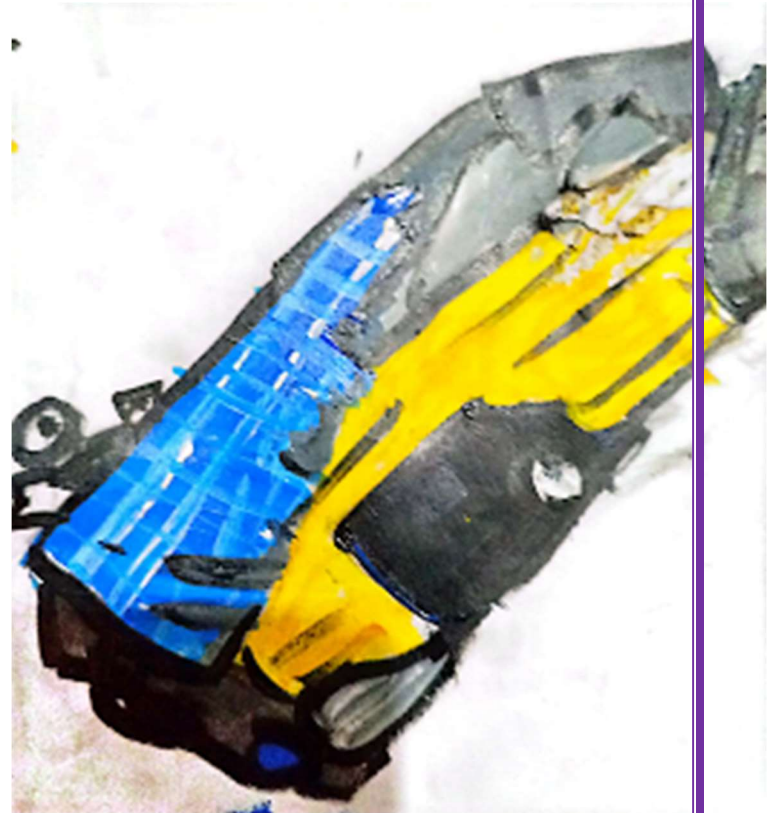

And I closed my eyes because I can go
without looking at the ground. Then I went
near the object. Then I hug my teddy bear
tightly. I took a deep breath. And I opened my
eyes taking a deep breath again. I saw a
SPACE SHIP! I was so surprised. Then I walked
around it and check it very well. Then I
realized that I had seen it

in my space ship book to.
Then I ran upstairs faster
to take that book. But I
didn't make any noise.

Then I slowly took my space ship book and
ran down stairs making a little noise. Then I
look at the book. Hooray! I found it. I shout
from my heart. Its name is kepler space ship.
Then I read the hall page so quickly. Because I
was so excited. Then I found the use of it. It
says that kepler space ship was using to find
alien planets.

And I was confused because I don't need a space ship that is finding alien planets. Then I just looked at it again. the shape of it is being rectangle shape. And the middle of it was orange and yellow in color. When it started the lights start to shine.

Then I looked at it again. I saw there was a letter. I was so surprised. I pulled it out. The cover of it was made by pieces of the moon and the planet mars. Then I easily realized that it has send by mars people. The shape of

it was like the plane mars. Then I look at the other side. I saw there were written that FROM- MARS PEOPLE TO- ISUMI HERATH When I read it I was so confused. Then I remove the piece of selotape. Then I took the letter out and started to read it. It says

Dear Isumi darling,

We are mars people. We send this letter in the kepler space ship. And you know what is the use of the kepler space ship. We know what are you thinking right now.

You are thinking 'oh I am useless to mars people. You are thinking like that, aren't you? So whatever you are the help fullest girl that we found from the hall planet earth.

So this is what. The kepler space ship had found an alien planet called kepler22b. it is similar to your planet. And it is bigger than your planet. And aliens are going to attack our planet. It means planet mars. We need your help

*darling. Get on the space ship and come to the space
quickly. We are waiting for you.*

Thank you,

From - Mars people

OH! I am so happy. Am I really going to the space. Seriously I can't believe this. I went inside and kept my teddy bear on the sofa. Then I went near the door and off all the lights. I went out and get on the space ship. The lights of it started to shine. I was so excited. Then it makes a little sound. OH it is going to the space. I can't express my feelings from words. I saw many wonders. I saw mars people waving hands at me. Then the kepler space ship went so faster. It was so close to planet mars now. It went to the planet mars. Then it stopped. I got down. I saw mars people. They were running at me. They all

came at me. I was so excited one girl hugged me. I was confused. Then she said, 'oh darling, how are you? Are you scared to stay in the space or are you scared for us?' she asked. Then I said, 'I am fine. But I am not sure you are mars people. I am sorry to say that. 'it's okay. We can confirm it like this.' That girl said. Then all of them show me their 'NASA' badge and there was written mars people. Then I confirmed it. 'WOW! Thank you. One day I am going to be like you.

You are a good girl. So do you know, aliens can't find our planet. So shall we go around our planet. I mean mars. But only till they find us. 'Yeah! Thank you, thank you, thank you.' Ok. Then let's go. Are we going by our legs to

the top of the planet? No darling we are going by a car. Can you guess the name of it? Then I said, mm..... is it the tesla car? Yes, girl you are correct. Then a boy came with a car. I was excited. All of them went there. And one by one get in the car. Then I got in the car. It started and go faster. and we only ride 20 minutes to go to the top of the planet. Then the car stopped. We all got down. I hugged that girls because I don't have my teddy bear right now. Then they asked from me, Isumi shall we explain about the planet mars? I said, yes of course. I like to know more information. Then they started.

Ok. Mars is the fourth planet and the furthest terrestrial planet from the Sun. The reddish color of its surface is due to finely grained iron(III) oxide dust in the soil, giving it the nickname "the Red Planet". Mars's radius is

second smallest among the planets in the Solar System at 3,389.5 km. and scientists have found an imaginary face in there to. They are believing that people are going to the planet mars in the future. Oh! I haven't heard that information before. Thank you so much. we heard a sound. It is like a sound when UFOS are coming. Then we look at the other side. Oh no! they are aliens. I was confused. Then they came closer and closer to the planet mars. It stopped. But the lights didn't off. The door opened. A one alien got down. He looks around. He didn't saw us because he only looks at the space. Then one by one four aliens got down. They saw us. And a one tall alien came near the mars people. We were so scared. Then the alien talk to her. Hello we need this planet. So you can go. When he said like that we were

confused. Others show us guns. Then I ran to the middle and stretch my hands. I said, please don't fight. Dear aliens you have a one planet. And it is bigger than this planet to. And they have only this planet to. So I think planet mars need to belong for mars people and alien planets needs to belong aliens to. So they look at me. Then they said, thankyou girl. Thank you so much for teaching us good things. I put my hand inside my pocket and took out a CD. And I give it to them. Hear, take it. It is about lord Buddha's dhamma. When you are going back listen to it. Then you will realize about it. Thankyou darling, we will listen to it. Aliens said. I was so happy. Then they turned the other side and got on the space ship and went. I was so happy. I ran near them and hugged them tightly. They hugged me to. You saved us from that scary

aliens. Thank you, you are a braveness girl. I thought I can't send them back. I was so happy. I turned around and I danced. I am sleepy now. Mars people can I go home now? Ok darling you can go by the kepler space ship again. I got on. The light started to shine. And it slowly flies to the air. I hugged it tightly. It goes faster to our house. I touch the clouds to. That was beauty fullest day in my hall life. I shouted. Now I am so close to our house. Then it went slowly. When it goes down I touched our garden gate. It slowly landed. I got down and I slowly opened the door. I went upstairs and I went to the bed.
